

# the *complete* solution

audio and video entry control, gate and barrier automation  
and access control

## BPT Audio and Video Entry Control Systems

- UK leader in the distribution and support of a full range of audio and video entry control systems
- One of the highest reliability ratings in the industry, hence one of the lowest return rates
- Innovations and features not seen in any other entry control equipment, with awards for product innovation, design and overall performance
- More door entry control systems sold to the trade and specified than any other entry control supplier
- Custom-made vandal resistant and Disability Discrimination Act entry panels
- Entry panels integrated with proximity access control and keypads
- Systems to suit 2 wire or CAT5 installations
- Cost-effective kits
- Systems that go beyond the imagination for size and complexity
- Excellent technical support and training, including DDA training

## Impro Access Control

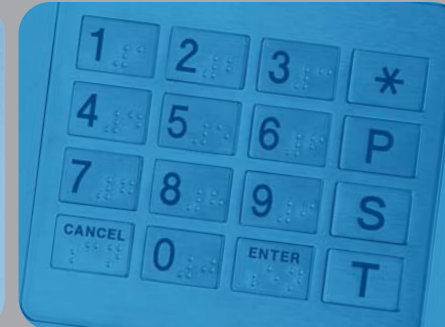

- ▲ The most extensive feature to price ratio on the market
- ▲ More features as standard including full colour graphics plans, intelligent vehicle access control, full card printing software, lift/elevator control and three anti-passback modes
- ▲ From single door entry to a system capable of controlling 256 remote sites; 1 door to 3,000, 1 user to 160,000
- ▲ Expert system design assistance
- ▲ Fast track instructions to speed up the installation process
- ▲ Three year guarantee
- ▲ Superb telephone technical assistance
- ▲ Readily available technical field sales support
- ▲ Next day delivery on all standard products
- ▲ Ample and comprehensive literature
- ▲ Unrivalled training facilities
- ▲ Use of our comprehensive demonstration equipment
- ▲ Speedy turnaround on quotations

DDA entry panels

For sales advice, quotes, ordering equipment, requesting literature, arranging training or technical advice, call 01442 230800, fax 01442 244729 or e-mail [sales@bpt.co.uk](mailto:sales@bpt.co.uk).

Our lines are open every weekday from 08.30 - 17.30. We close for weekends, bank holidays and at Christmas through to New Year.

# BPT range of DDA entry panels

With a comprehensive understanding and appreciation of the Disability Discrimination Act 1995 regulations, BPT have been supplying DDA panels since 2000 and also offer specialist DDA training.

## What is the definition of a disability?

The Disability Discrimination Act 1995 (DDA) defines disability as being "a physical or mental impairment which has a substantial and long term adverse effect on a person's ability to carry out day-to-day activities". For example: mobility; manual dexterity; physical coordination; continence; lifting, carrying or moving objects; speech, hearing or eyesight; memory, concentration, learning or understanding; or recognition of physical danger. There are over eight million disabled people and an increasingly elderly population in the UK.

## How does the Disability Discrimination Act 1995 affect Door Entry and Access Control?

Every day, disabled people need to use a wide range of goods, facilities and services, but these same people often face real problems in trying to gain access to those facilities and services. Controlled entrances can prove an impossible barrier; an audio door entry system can be difficult to use by those with limited or no hearing; a keypad access control system is next to useless for the sight impaired or for those with limited hand mobility.

Clearly, none of these building designs or security measures were ever meant to keep disabled people from access, but the result can be just the same: exclusion.

## Why BPT?

We have put a lot of work into clarifying the issues that relate to door entry and access control systems, into fully understanding what is required in meeting your duties under the DDA and into subsequent product development. Our understanding and appreciation is highly valued by our customers, in both the public and private sectors.

## What products are available to meet the requirements?

We can offer many solutions to providing access to goods, facilities and services to disabled persons.

Vandal resistant entry panels can be manufactured, depending on the customer/site requirements, to incorporate:

- Large illuminated tactile and/or Braille buttons
- A 'Speak Now' red LED to indicate when to speak to those with a hearing impairment
- A 'Door Open' green LED to indicate lock release/door opening to those with a hearing impairment
- Audible tone to indicate lock release/door opening to those with a visual impairment
- A video camera for added security
- Proximity access control to allow access to the rightful occupants with ease
- Tactile and/or Braille signage for those with a visual impairment
- Double height panels to accommodate wheelchair users

## What should be taken into consideration?

DDA panels, by their very nature, tend to be larger than standard panels as the buttons are often bigger and there has been some reluctance on the part of designers and architects to use them.

## Don't take chances...specify BPT.

Useful information on all aspects of the DDA can be obtained from the Centre for Accessible Environments at [www.cae.org.uk](http://www.cae.org.uk), the Government's Disability Unit at [www.disability.gov.uk](http://www.disability.gov.uk) and The Disability Rights Commission at [www.drc-gb.org](http://www.drc-gb.org) or on their DDA helpline, 08457 622 633.

Our entry panels have all the quality, durability and style you expect from BPT, but are adapted to include tactile illuminated buttons, Braille characters and LED indicators.

The range is based on our interpretation of the relevant requirements of the DDA and we also offer other designs and styles including double height panels and proximity access control.

### VRADDA/1

12swg stainless steel vandal-resistant audio, flush mount, includes illuminated/tactile 'CALL' button, 'SPEAK NOW' LED and 'DOOR OPEN' LED, 225hx120w front plate dimensions

### VRADDA/1 + VRSH/300/1 SURFACE HOUSING

70mm depth at top reducing to 60mm at the base

### VRVDDA/1

12 swg stainless steel vandal-resistant video, flush mount, includes illuminated/tactile 'CALL' button, 'SPEAK NOW' LED and 'DOOR OPEN' LED (requires MVT/100), 325hx120w front plate dimensions

### VRVDDA/1 + VRSH/300/2 SURFACE HOUSING

80mm depth at top reducing to 70mm at the base

### VRADDA/6

12swg stainless steel vandal-resistant audio, flush mount, includes 6 illuminated/tactile 'CALL' buttons, 'SPEAK NOW' LED and 'DOOR OPEN' LED, 325hx120w front plate dimensions

### VRAD/KEP-DDA

12swg stainless steel vandal-resistant digital entry panel with Dewhurst keypad, Braille characters, proximity access control reader cut-out (reader not included), 'SPEAK NOW' LED and 'DOOR OPEN' LED, 550hx165w front plate dimensions

### VRADDA/DUAL

12swg stainless steel vandal-resistant audio, flush mount with dual controls, includes illuminated/tactile 'CALL' button, 'SPEAK NOW' LED and 'DOOR OPEN' LED, 700hx120w front plate dimensions. This panel can be surface-mounted using VRSHDDA/DUAL
