

Defender Full Height

Description

The EA Full Height turnstiles are robust, highly reliable pedestrian security gate solutions either internal or external applications. Both variations are available; 120° with three rotor arms, and 90° with four arms. These vandal proof arms will keep the turnstile secure even after the high force impact, and can be supplied with either a single or double cage with a choice of finish options. The hand held elements are covered in stainless steel for a permanent robust finish. EA Full Height turnstiles can be operated automatically by means of any access control systems including; card readers, biometrics, intercoms, remote control or manually with human intervention. Our range of full-height turnstiles are all manufactured at our EDS factory here in the UK.

Features

-  30 users p/min
-  0.8s Opening time
-  600mm passage widths
-  Two way operation
-  Anti - tailgating

Controlled by

-  Access control system by others
-  Remote or desk operation override is an option

Technical specs

Width, mm	1428
Length, mm	1168
Height, mm	2297
Weight, kg	300-350
Mechanism	Electro-mechanical
Standard housing	Brushed AISI 304
Available housing	Brushed SS AISI 316 Polished SS AISI 304 Polished SS AISI 316 Hot dip galvanised Powder Coated RAL

Electrical specs

Voltage	- from the AC (100-240)V, 50/60Hz; - from a DC source 12 V
Maximum power consumption	30 W per pass
