

Glass Swing Gate

Description

The contemporary style EA Glass Swing Gate is the simplest and most affordable way to control and restrict access available from 500 to 900 mm clear opening. It is perfectly suited to accompany access controlled products where a wider access is required. The stylish design perfectly balances the importance of an aesthetic appearance with high safety and traffic flow capacity and blends perfectly with the other EA range of turnstiles. They are equipped with servo-actuators that can be controlled in either manual or automatic mode. The operational principle of this gate is based upon the device locking the leaf in its closed position. When access permission is granted, the actuator rotates the flag-shape blade to 90 degrees and returns to its initial closed position when access is completed. Our Glass Swing Gate is easy to use, and it has a small space saving footprint. This product is normally operated by a push button by staff.

Features

-  Open for 15s (adjustable during install)
-  500-900mm passage width
-  Two way operation
-  Suitable for disabled access

Technical specs

Width, mm	1020
Length, mm	170
Height, mm	1000
Weight, kg	25
Mechanism	Motorised
Standard housing	304 grade SS

Controlled by

-  Remote or desk operation
override is an option

Electrical specs

Voltage	- from the AC (100-230)V, 50/60Hz;
Maximum power consumption	30 W per pass
